AIM AND PROGRAMME

The International Summer School on Banking & Capital Markets Law consists of a five-day programme. The first day will take place at Università Cattolica del Sacro Cuore in Milan and then the participants will move to Villa Vigoni at Lake Como where they will spend the following days in a relaxed and constructive atmosphere.

Participants are expected to attend the entire Summer School.

The aim of the Summer School is to provide junior researchers and young professionals in the field with mentoring as well as with exposure to cutting-edge research in banking and capital markets law.

Participants will have the opportunity to present their own research projects (both completed papers and work-in-progress) and to discuss them with leading researchers. These presentations will be key components of the Summer School: participants will be invited to give concise presentations of their work, followed by an in-depth discussion of each contribution among participants and senior scholars.

Participants will also have the opportunity to attend lectures given by high-level speakers, such as senior academics, representatives from EU and national supervisory authorities, the European Commission and practitioners in the field, who will conduct interactive workshops on the most recent topics of banking and financial law, including

- FinTech
- Corporate Governance of financial institutions
- European Banking Union
- Capital Markets Union
- MiFID II
- Market Abuse Regulation
- Brexit
- Sustainable Finance.

In order to ensure a highly interactive environment, the number of participants will be limited to 30.
